BEC supports the entire bioeconomy ecosystem

SMEs / Industry

Voucher scheme – inspired
by H2020 INNOSUP

EIT Food Hub – Start-ups

International projects
(benefits for SMEs)

National / regional level

RIS3 – Healthy Food &
Environment (EDP)

National platform
AgroBioFood Nitra –
proposal PROSPECT

CAP Strategic Plan 2021 -
2027

EU level

Membership in Working
groups

International cooperation

Role of clusters in Green
Recovery

GoDanuBio

- Addressing demographic change using circular bioeconomy (CB) as a tool to foster regional development
 - Analysis of CB framework conditions, incl. identification of regional excellence and CB stakeholders that need to be included in participative governance processes
- ⇒ Transnational participative governance model (strategy + action plan) for tackling demographic change via CB

CO-FRESH

- Horizon 2020 project 
- Developing techniques, tools and insights for the re-design of agri-food value chains
- Testing of innovative business models enhancing sustainability and competitiveness of agri-food value chains
- 7 pilot cases representing diverse fruit and vegetables agri-food value chains (incl. protein crops for food and feed)

Clusters in Green Recovery Plan

- DG GROW motivates / encourages MS to include clusters into Green Recovery Plan at national level
- Clusters able to ensure cooperation across entire value chain
- Clusters to introduce ambitious, world-class and unique solutions
